CADT IDT

W1-S2 *PRACTICE*

HTML ELEMENTS

At the end of this practice, you should be able to…

- ✓ Manipulate **Image**, **Tables, Lists, paragraphs, headings and hyperlinks**

How to work?

- ✓ Download **the start code** from the LMS
- ✓ Open the folder in VS Code

How to submit?

- ✓ **Push** your final code on **your GitHub repository**
- ✓ Then **attach the GitHub path** to the MS Team assignment and **turn it in**

Are you lost?

You can read the following documentation to be ready for this practice:

- ✓ WC3 School - Links
- ✓ WC3 School -Tables
- ✓ WC3 School – Bloc and inline elements
- ✓ WC3 School -Tables

No AI during this work!

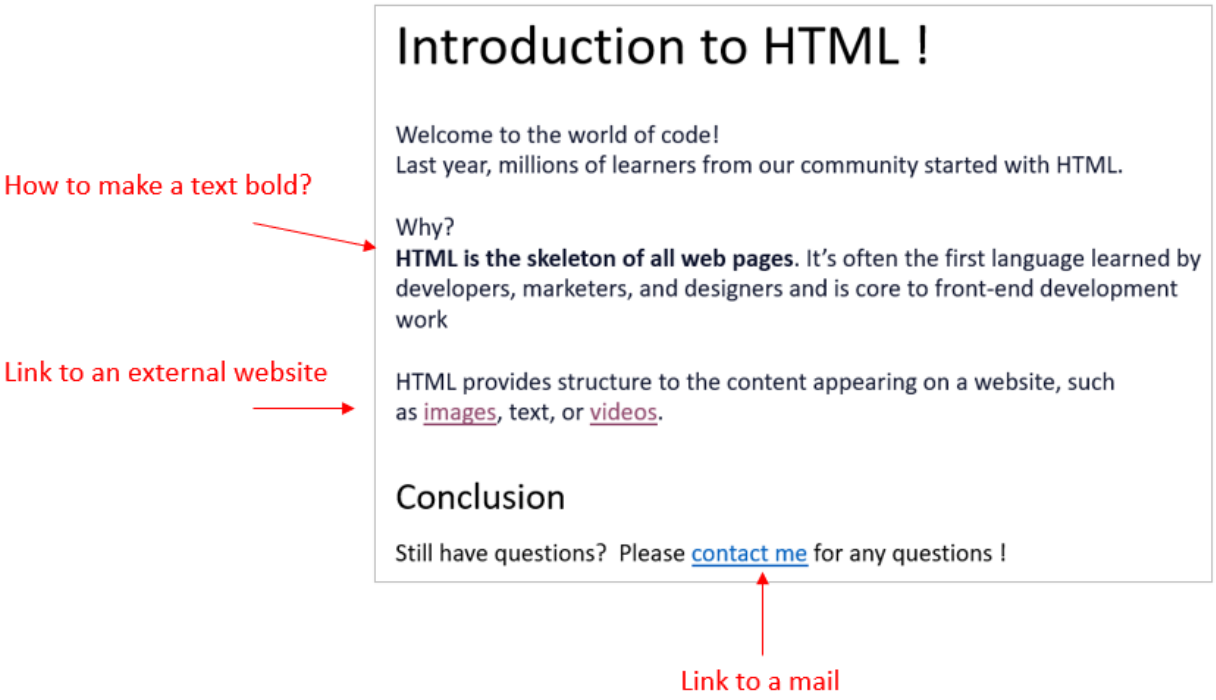

- ✓ No AI during this practice so you can **learn to solve problems by searching on internet**.

EXERCISE 1 - A Blog Post

For this exercise, your need to create a simple blog post with the following structure:

- A <h1> for the title of the blog post (*e.g., "My First Blog Post")*
- Two paragraphs of text using the <p> tag, discussing any topic of your choice
- A hyperlink to an external website (*e.g., link to a Wikipedia article related to your blog topic*)
- A <h2> tag for a subheading (*e.g., "Conclusion")*
- A final paragraph summarizing your blog post.
    - You should also create a hyperlink to a mail (*e.g., "any question, please contact me")*

You can find bellow an example of post (*just an example):*

Exercise1-answer

My first blog post.

Welcome to **CADT** the world of technology!
This year so many student register to take the entrance exam but the school only selected 350 student.

Do you know why there so many?
Cadt is a school only focusing on technology fields so there many oppunity to explore the world.
you can also explore or get more information HERE images

Conclusion

If you have any question please contact to Academic Affairs

EXERCISE 2 – Relative paths

Here is a website folder structure.

YOU JOB: Fill the table with the **missing hyperlinks**, so that we **can create a link** from the source page to the destination page.

SOURCE PAGE	***DESTINATION PAGE***	***HYPERLINK***
action.html	cinema.html	`<a href="../cinema.html">`
home.html	songs.html	`<a href="./Music/song.html">`
help.html	action.html	`<a href="./movies/action_movies/action.html">`
cinema.html	help.html	`<a href="./../help.html">`
action.html	home.html	`<a href="./../../home.html">`
cinema.html	action.html	`<a href="./action_movies/action.html">`
songs.html	action.html	`<a href="../movies/action_movies/action.html">`
action.html	songs.html	`<a href="../../Music/song.html">`

EXERCISE 3 – A Small Website

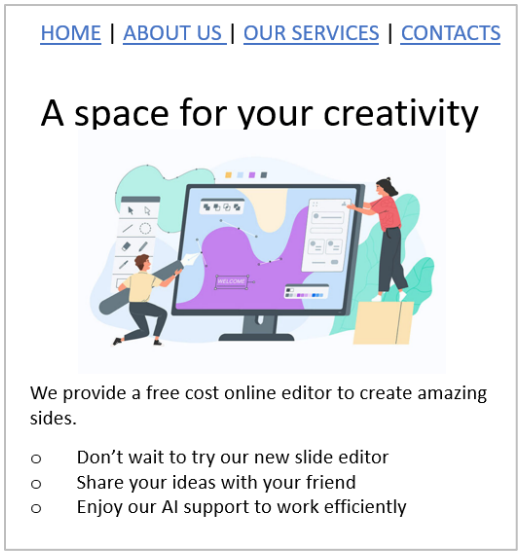

For this exercise, you need to build a small website with 4 pages and a **menu**

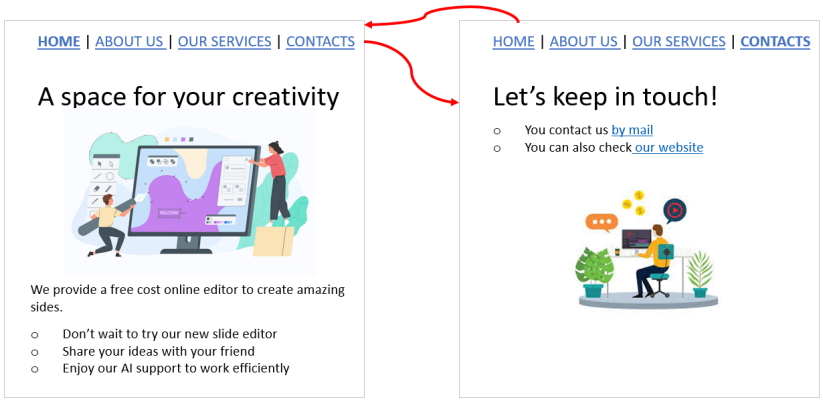

- Home
- About us
- Our Services
- Contact

We should be able to navigate **from any page to the other pages**, using the menu

Each page of your website should contain:

- The menu
- A title
- An image
- A list of items
- A paragraph

Feel free to express your creativity!

Exercise3-Answer

HOME| ABOUT US| OUR SERVICES| CONTACTS

Growing a Better Future Through Agriculture

Welcome to our agriculture website! We share useful farming knowledge, promote sustainable agriculture, and help farmers grow healthier crops.

HOME| ABOUT US| OUR SERVICES| CONTACTS

ABOUT US

We are passionate about agriculture and supporting farmers. Our goal is to promote modern farming methods, protect the environment, and build a greener future.

Our services

- **Farming Tips :** Helpful advice for better farming.
- **Crop Management:** Tips for growing healthy crops.
- **Agricultural Products:** Information about seeds, fertilizers, and farming tools.
- **Sustainable Farming:** Encouraging eco-friendly farming practices.

Contact

Have questions or want to learn more about agriculture? Feel free to contact us!

- Email: meymey.com
- Phone: 012 345 678
- Address: Phnom Penh, Cambodia

EXERCISE 4 – Product Information

For this exercise, you need to create tables

- Create a table to display a product catalog for an **online store**
- Use an <h2> tag to title the table (e.g., "Product Catalog").
- Create a table with 4 columns:
    - Product Name
    - Price
    - Quantity
    - In Stock

- Add 3 rows of product data with sample values (e.g., "T-shirt," "$10," "20," "Yes").
- Add a header row at the top of the table to describe each column.

Welcome to CADT Shop!

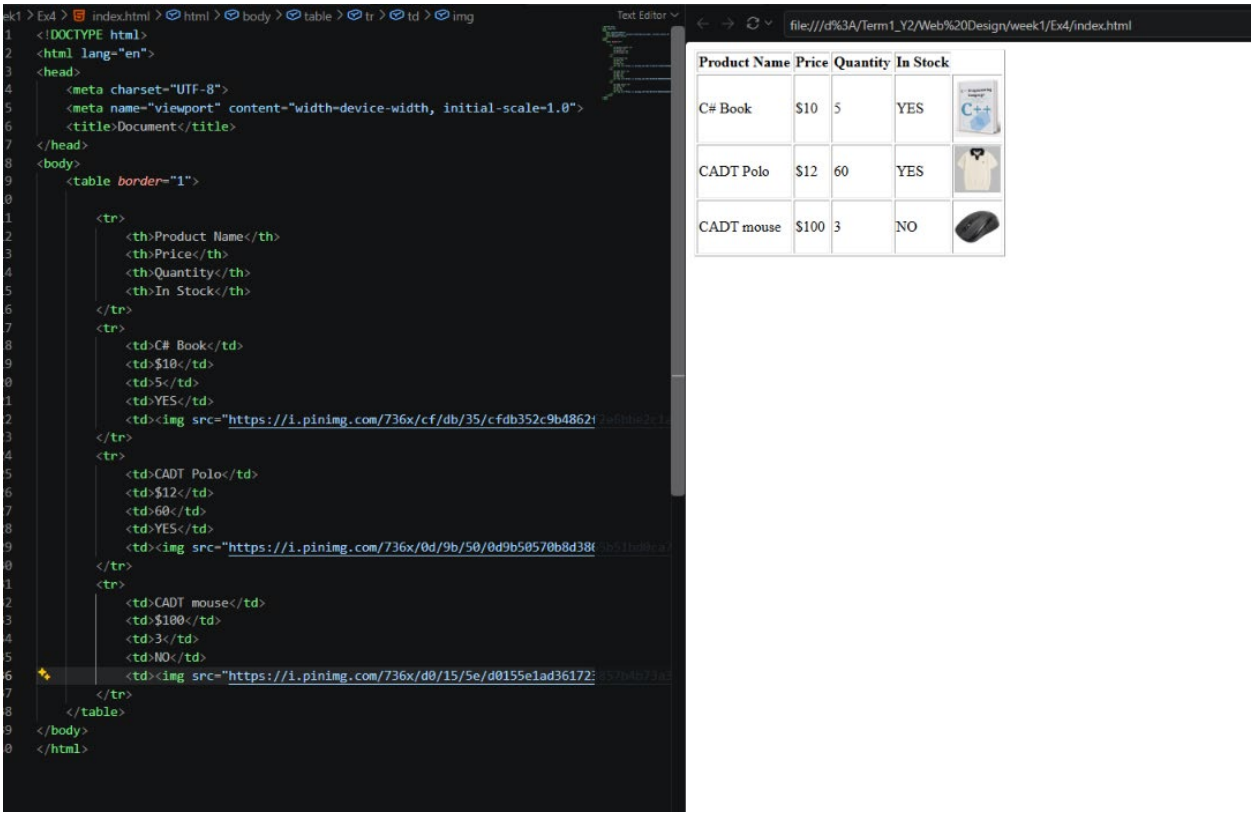

Product Name	Price	Quantity	In Stock
C# Book	$10	5	YES
CADT Polo	$12	60	YES
CADT mouse	$100	3	NO

Are you lost?

- ✓ WC3 School -Tables

Bonus

- As a bonus: you **add another column**, containing a thumbnail (small image) of the products!
- As a bonus: you can try to **style your table** using the <style> tag inside the <header>
